

Long-Term Academic and Career Plan – Professional and Technical

Study Plan

It is important to have a clear, well thought-out, realistic plan. Remember that the Professional and Technical degrees are meant to train you to enter the work force. For your visa interview, you can make more general preparations about your career plans with this planning sheet.

Professional and Technical Program in: _____

(Write your intended Professional and Technical Program in the space above).

Seattle Central

Research facts and information about the program at Seattle Central and write them below:

Career Plan

You must consider what kind of job you will have when you return to your home country. Be sure to link your intended degree to your career plan. Do some research to find out what kind of job you can have with the training you will receive in your program. Look in newspapers, in industry publications, or talk to people who already have a job in your field to find out more about possible jobs.

Your career plan should include the following:

OPTION 1:

Job title

Job description

Potential Employers (Companies)

- 1.
- 2.

OPTION 2:

Job title

Job description

Potential Employers (Companies)

- 1.
- 2.

At the interview, be prepared to talk about the demand for your profession in your home country. If the professional and technical program prepares you for a field that is not a high-demand field in your home country, you must consider carefully what kind of job you will have when you return home.
